(54) Title: **ENDOTRACHEAL TUBE HOLDER**

(57) Abstract: An endotracheal tube holder for restraining an endotracheal tube in a patient's mouth includes a base that is strapped to the patient's head. The base includes a tube-securing block and clip-securing blocks. A separate, U-shaped clip is engagable in ratchet fashion to the base between the tube-securing block and the clip restraining blocks to secure the endotracheal tube to the tube-securing block.
